

Demonstration video script — one speaker

Group code **MOB-G03-7014**. One person holds the phone, speaks, and taps. One continuous, unedited recording. Maximum 90 seconds. Aim for about 80. The status-bar clock stays visible the whole time.

At the start, say your own name, registration number, and role. Practice the typing until the valid form takes under 15 seconds. Keep this beside the phone: Mama Keza, MZ-A-014, Produce, +250 788 123 456, High.

Time	Screen	Do this	Say this
0:00–0:08	Expo Go, then the green header	Open the app. Keep the header and the phone clock in frame.	I am [your name], [your registration number], [your role]. Group MOB-G03-7014.
0:08–0:18	Home	Show one card with its status chip and priority word. Type zzzz. Tap Clear search.	Six stalls. Each card has a name, category, priority, and status. No match shows the empty state.
0:18–0:40	New Inspection	Tap Continue to review on the empty form. Type stall code A14 and tap Continue again. Then enter the valid values from the paper and tick consent. Do not continue yet.	Empty fields are blocked. A14 is blocked. Each message sits under its field. This valid form can continue.
0:40–0:55	Evidence photo, same form	Tap Capture photo or Choose from gallery. Show the preview. Tap Replace photo and pick again so a photo stays attached.	Preview. Replace. If permission is denied, the form stays and the other source still works.
0:55–1:05	Records, then New Inspection	Open Records, then return to New Inspection. The form must still be filled.	Records is empty until save. Back on New Inspection, the same answers are still here.
1:05–1:20	Review. Do not tap Save.	Tap Continue to review. Hold until the recording ends. Group code, answers, photo, and phone clock must all be visible.	Review shows MOB-G03-7014, the inspection, the photo, and the clock.

Stop once the review screen is steady. The last frame is that screen. Do not tap Save. Save leaves Review, and the brief says the video must finish there.
