

Test log — MOB-G03-7014

SWE 3409 Assignment 1. Musanze Safe Markets. Tester role: Member 4, Mohammed Osama Hasan, with release notes by Member 5.

Environment: Windows 11, Node.js 22.23.2, npm 10.9.8, Expo SDK 57, Expo Go, start command **npm start** (tunnel).

Checks completed on the computer

Check	Result
TypeScript <code>npx tsc --noEmit</code>	Passed after the camera workflow was added.
Validation script <code>src/validation/inspection.check.ts</code>	Passed. One valid inspection accepted. Eight invalid cases rejected: blank form, A14, mz-a-014, MZ-G-001, 0788123456, +250 688 123 456, missing consent, missing image.

Checks completed on a phone

Check	Result
Expo Go opens the project	Passed after starting with a tunnel. A direct LAN address on campus Wi-Fi failed with "Failed to download remote update". Metro then served the bundle to an iPhone.
Group code visible	Header is implemented as MOB-G03-7014. Confirm again in the demonstration video.

Still to record on the device

These rows are not marked passed. The group must run them while recording evidence/MOB_A1_G03_DEMO.mp4 and then update this log if the lecturer requires a completed device table.

Assessor step	What to observe	Result
Catalog	Six stalls, status chips, priority words, search empty state	Not recorded in this file
Invalid form	At least two field errors block review	Not recorded in this file
Valid form	Mama Keza, MZ-A-014, Produce, +250 788 123 456, High, consent, one photo, then review	Not recorded in this file
Navigation	All tabs, detail stack, back keeps the in-memory list	Not recorded in this file

Permission denied	Useful message and the other photo source still works	Not recorded in this file
Image	Capture or gallery, preview, replace, remove	Not recorded in this file
Large font	Text wraps and stays readable	Not recorded in this file
